

DECLARATION OF THE RIGHTS OF THE PEOPLE OF SOUTH ASIA (ASIA COMMUNE)

The Asia Commune is writing these lines in the evening on **27th November 2024**. The situation is very critical whole regions in the world today. In fact, it is now absolutely clear that to delay the uprising would be fatal.

The Asia Commune urges you with all its might to understand the extremist situations and the war fears in every corner of the world. The current crisis cannot be resolved through the conferences, seminars, workshops, congresses, popular political fronts, parliaments, courts and non-governmental organizations. Furthermore, to seek the solutions through the existing system could lead to more terrible barbaric situation.

Working people and the other oppressed they themselves must find out a solution and the program to challenge for this system.

We must respect and understand the following principles to be set up a solution.

1. The Marxist basis of historical materialism.
2. A political leadership and organization to be created an international socialist revolution.
3. We must have a tool to communicate with the masses how capitalism is functioning today.
4. Establishing an inter-coordination committee among working people in South Asia
5. We have to understand, that the revolutionary situation in India or any other country can be secured by the united organization of the working people in South Asia.

6. It cannot be defeated capitalism in South Asia only by speaking or writing. For that, the people of South Asia must be reunited, divided by the British, Portuguese, and Dutch. Therefore, we propose to remove the existing borders.

7. Must be rejected the debt-dependent system from the capitalist international financial institutions. At the same time, a new regional financial system and a new economic model must be experimented with the strength of working people.

8. The total population of South Asia is 2.04 billion. 78.8% of this population lives below the poverty line. This situation can be worst in the future. Therefore, these people should be directed towards to the class struggle.

To achieve this, we must defeat the racism, religiousism and casteism that have gripped the entire region. In particular, the Hindu extremist fascist regime that has gripped India must be defeated. The working people of the entire region must be united to overthrow the Indian capitalist religious regime.

9. Bangladesh, Pakistan, and Afghanistan have been affected by violent Islamic fundamentalism. The entire South Asia must join hands to overcome this extremism.

South Asia should unite to ensure the rights of the Tamil and Muslim people in Sri Lanka by the Sinhala Buddhist extremism.

10. We should examine the system of governance established by the communist parties in Nepal. Nepal has become the poorest country in South Asia. The comrades those who are in these communist movements should think very deeply about the ongoing situation.

Today, the Asia Commune proposes the one revolutionary political front for the entire South Asian region.

1. The equality and sovereignty of the peoples of South Asia.

2. The rights of the people of South Asia to free self-determination, even to the point of separation and the formation of an independent state. We believe that such acceptance is the path for unity.

3. We declare that no special privileges should be given to races and religions based.

4. The free development of all minorities and ethnographic groups living in the territory of South Asia.

We strongly declare that we must organize to overcome the above issues. For this, we will appoint a regional political council representing the countries of India, Bangladesh, Pakistan, Sri Lanka, Nepal, Afghanistan, Bhutan and Maldives.

Let us begin practically from Bangladesh

Today, the situation of Bangladesh is very terrible and critical. Recently, there was a huge uprising of the student movement in there. It began in June 2024.

Finally, the leaders of the student movement appointed Dr. Muhammad Yunus as the head of the interim government. Yunus, a representative of global capitalism and he is completely unsuccessful today. He has authorized the military to arrest civilians. Continuously, Islamic extremist groups have become stronger. Bangladesh is moving in the direction of jihadism.

In this circumstance, the pseudo-left and the other leftists in Bangladesh are acting like as the voiceless viewers. The pseudo-left is over in Bangladesh as like in Sri Lanka too.

Fortunately, several militant leftist groups in Bangladesh have begun to think afresh. Meanwhile, Comrade ABUL HOSSAIN and several the other groups have come forward together to form a new left movement in Bangladesh. Let us start a new revolutionary chapter from Bangladesh.

The Asia Commune International Bureau

(India, Bangladesh, Pakistan, Sri Lanka, Nepal, Afghanistan, Bhutan and Maldives)
