

To the Delegates of the Second Congress of the PST (Socialist Workers Party- Argentina) 05/09/2026

Revolutionary greetings from ASIA COMMUNE and THE MARX –SOUTH ASIA

Dear Comrades,

We send our warmest revolutionary greetings and internationalist solidarity to the delegates, workers, and youth gathered at the Congress of the Socialist Workers Party-Argentina. Your congress meets at a crucial historical juncture. As the working class in Argentina faces the brutal shock therapy of austerity, state repression, and imperialist dictates, your party's interventions—both in the streets and through your congressional platform—serve as an inspiring example of revolutionary militants worldwide. The task before us is clear: we must build a powerful, independent political force of the working class. We have to turn the anger of the oppressed into conscious Marxist organization. There can be no compromise with the bosses or reformist illusions. We are certain that the political resolutions voted on by this congress will strengthen the anti-capitalist left and pave the way for a true working-class rebellion. Together, we will defeat the far-right agenda and win a future free of exploitation.

The activists of the world, who once found in the left tools for struggle, now find a constellation of groups in crisis that support dictatorships, some of the most horrific regimes in the world such as the Communist Party of China, Cuba, or North Korea, which collaborate with capitalist governments. And that the only thing they care about is electoral intervention. This reality has unleashed a process of "global disillusionment" of the world's activists with the left, which includes the existence of valuable cadres who detach themselves from these currents in the search for Marxism, and a truly revolutionary leadership.

To counteract this "global disillusionment" of the world's activists, and the process of disintegration and dispersion that all these groups are suffering, they make a permanent call for the "unity of the left", a call that is stronger as the elections approach. We flatly reject all these hypocritical calls for "unity" because they are a trap. They are not called to support the revolutions of the world, or to fight for a workers' government, but they are called to join their policy of support for capitalist governments. We reject this call that they constantly make in forums, meetings, congresses, debates, etc. that abound in the world, because it is not that kind of "unity" that we need, but the "unity" of revolutionaries.

Today, 99% of the global left movement is mired in revisionism. Let us hope that this second Congress of yours will be a shot in the arm that defeats revisionism.

Down with capitalist austerity and imperialism!
Long live the international unity of the working class!
Forward to the socialist revolution!

The political bureau – ASIA COMMUNE and The MARX SOUTH ASIA
